

# Truth or Dare

---

**THE GREATEST CYBER HYGIENE  
GAME EVER MADE!**

# Rules (1)

---

You can play it in English or in Estonian

The player forced to choose between one of the options. To not choose it is not an option. Choosing both is not allowed.

If he chooses Truth, then he will have to truthfully answer a question which the game has to come up with.

If the "victim" answers dare, then he has to fulfill an action which will be imposed by the game

# Rules (2)

---

The group decides if the answer or action were given or performed correctly. They may tease the "victim" to draw out the dare a little longer or to reveal more details about his answer. Generally, the group decides everything.

After that, the first players turn is over and the game will choose its new "victim".

The game goes on until the group decides it no longer wants to play.

# Truths

---

Have you ever wrote passwords to the paper?

Have you ever downloaded pirate software?

Have you computer ever had a virus?

Do you log off from social networks after usage?

Do you know the difference of HTTP and HTTPS?
